DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1, 2, 4-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Dryon.

Regarding claims 1 and 4, Dryon teaches a method for separating a pane of a brittle material from a moving sheet of material comprising the steps of:

- (a) releasably engaging the moving sheet within an area defined by the to-be-separated-pane (belts 8, 9);
- (b) rotating the to-be-separated-pane about an axis which substantially coincides with the separation line (at the location where belt assembly 4 and 7 meet); and
- (c) passively moving the separated pane relative to the moving sheet using gravity (gravity force separates the pane from the moving sheet since gravity force pulls the pane down from an inclined surface formed by the belt assembly 4 to a horizontal surface formed by the belt assembly 7).

Regarding claim 2, the sheet has a vertical vector component. See Fig. 3.

Regarding claims 5 and 9, Dryon teaches a method for separating a pane of a brittle material from a moving sheet of material comprising the steps of:

Art Unit: 3724

- (a) releasably engaging the moving sheet within an area defined by the to-be-separated-pane (belts 8, 9);
- (b) rotating the to-be-separated-pane about an axis which substantially coincides with the separation line (at the location where belt assembly 4 and 7 meet); and
- (c) moving the separated pane relative to the moving sheet by using spring force (spring 32 pulls the pane 37 down from an inclined surface to a horizontal surface).

Regarding claim 6, gravity force plays a part of pulling the pane 37 down from an inclined surface to a horizontal surface.

Regarding claim 7, the sheet has a vertical vector component. See Fig. 3.

Allowable Subject Matter

- 3. Claims 3 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

- 4. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phong H. Nguyen whose telephone number is 571-272-4510. The examiner can normally be reached on Mon-Fri.
